

> HOW DOES HE DO IT?

How does Santa get to every house on the planet on Christmas night? With the help of his custom built, mile-wide, state-of-the-art sleigh called the S-1, of course! Big enough to carry one million field elves plus a billion or so presents, this supership can cover over 7 million miles in one night.

See if you can help chart the S-1's course by navigating through the maze below.
