

InstituteForHumanContinuity.org

Gentlemen,

Per our previous discussion, the IHC has limited internal access to all of our Operation Safe Haven archival information and especially all future status reports. We recognize the potential risk to your program and believe the secrecy is warranted under these circumstances.

As of now you should have a complete repository of all our current research. There was some risk that our unofficial partnership would receive unwelcome attention from particularly idealist and impractical elements of our staff, but I've taken steps to prevent that outcome.

We wish you and your Project Naaczaal initiative nothing but success. You can trust that we at the IHC are doing all we can to help.

Sincerely,

*Barbara Lewis - Penn*
