

InstituteforHumanContinuity.org

Gentlemen,

I've just received your new projections on construction times and your new proposed scheme for awarding seats. I understand you had some hesitation in presenting this proposal to us because of the perceived ethical judgments they require. I assure you that there is no risk to the relationship between the IHC and Aerospace Robotics Corp. over this or any other similar matter.

We completely understand that pragmatic concerns, particularly financial and logistical ones, must take precedence. While others might decry your logic, your goals and those of the IHC are one and the same, and we are fully committed to seeing this through to 2012, no matter what that may require of us.

Sincerely,

*Barbara Lewis - Penn*
